

SpeakerSphere Subscription Outline

1. Basic (Free) – “Speaker”

- **Who it’s for:** New speakers just getting listed, or those testing the platform.
- **Features:**
 - Profile listing with name, headshot, and specialty.
 - Basic bio (limited word count).
 - Speaking topics (limited to 3).
 - ~~1 video upload OR 1 lecture/research file.~~
 - 1 lecture or publication upload
 - Ability to receive inquiries from event organizers
 - *Through our emails
 - Directory listing.

Notes: I think we should consider allowing one upload (.pdf file), this may bring more traffic to the site getting more visibility for us.

2. Pro (Mid-Tier) – “Featured Speaker”

- **Who it’s for:** Active speakers who want better visibility and more ways to showcase themselves.
- **Features:**
 - Everything in **Basic**, plus:
 - Rotation on the home page in the Featured Speakers section. (bottom 12 spots)
 - Expanded bio with more word count + custom sections.
 - Speaking topics (limited to 5).
 - Upload up to 5 of each: videos/lecture notes/research files.
 - Do we link from embedded in YouTube or Vimeo? This will depend on the website we use, can it link a gallery from another server?
 - Host locally will eat up storage? This is a Byron thing...
 - Add social media links, website
 - Featured speaker badge on profile.
 - Editable calendar of upcoming lectures.
 - ~~Access to analytics (profile views, clicks, inquiries).~~

Notes:

3. Premium (Top-Tier) – “Premier Speaker”

- **Who it’s for:** Established speakers who want maximum exposure and full customization.
- **Features:**
 - Everything in **Pro**, plus:
 - Top placement and “always on” listing on the Home Page under Featured Speakers (premium visibility).
 - Rotation in the top placement on the Find Speakers page. (Top 12 spots will be a rotation of the Premium speakers)
 - 10 video uploads (more space can be purchased if needed)
 - Unlimited speaker notes and publication uploads
 - Customizable section called the “Speaker Vault” where they can house, organize:
 - PDF notes/reviews of lectures
 - Publications
 - In this section the PDFs/lecture notes can be “password” protected
 - So a system that allows specific notes to be retrieved from specific lectures
 - And in that “code access” more than one document could be pulled up
 - Would this be the place where maybe later, they have contracts, travel details, comms with us/lecture hosts? Good idea, but I think that should be in another section like - “Virtual Agent” section.
 - What else??? Can’t think of anything now.
 - Direct messaging with event organizers. (is this in the Speaker Vault?) - Virtual Agent section
 - Access to analytics (profile views, clicks, inquiries), downloads, if we capture e-mails for the downloads, they can then have access to that information.
 - ~~Full profile customization (colors, branding, banners).~~
 - Ability to highlight upcoming events/availability calendar.
 - Would be good to have a calendar that popped up and maybe a button that says “book this speaker” on the calendar
 - Premium badge of some kind (sets them apart as “top recommended”).

Notes: Do we create a download area? Master themes, fonts, images, etc...?

OTHER ADDITIONS:

Top booked speakers (through our site?) down the road

Top scheduled speakers? Down the road
